

Their support was really reassuring.

Advocacy: A guide for professionals in Southampton

What is an advocate?

Advocates are independent professionals who work with people to help them understand their options, know their rights and say what they want.

This helps to make sure that people are involved as much as possible in decisions about their health and care.

Your duty to refer

Advocacy is a statutory right for eligible people. The Mental Capacity Act and Care Act state that you must refer eligible people for advocacy. The Mental Health Act states that you must make eligible people aware of how to access advocacy.

Who is eligible?

Use the grid in this leaflet to find out who you must refer.

If you are unsure about eligibility, or have questions about advocacy types, contact us.

In Southampton you can also make an advocacy referral for:

- people with learning disabilities who have housing issues to resolve
- parents with a learning disability whose child is subject to child protection proceedings

- people in hospital who need support to be fully involved in the hospital discharge process

What do advocates do?

An advocate can support someone to:

- communicate their views and wishes
- understand their rights
- understand any processes and decisions they are subject to
- understand the options they have
- make their own choices
- challenge a decision

Even when someone can't tell their advocate what they want, our advocates will use a range of approaches to establish their views and wishes as far as possible and secure their rights.

In some circumstances, an advocate has the right to access medical or care records on behalf of the person they are supporting. An advocate may write a report that must be taken into consideration by professionals.

An advocate does not:

- offer counselling or befriending
- offer legal advice
- tell people they support what decisions to make
- tell health or social care professionals what decisions to make
